AF 302-P PRODUCT DESCRIPTION SHEET

Product Description:

The AF 302-P is a patented kit for repair of damage to commercial airline baggage compartment liners that result from routine cargo handling and transporting. FAA regulation 25.855 requires that baggage compartments of all airliners landing at United States airports must be repaired with fire retardant material meeting FAA specifications. The AF 302-P is an inexpensive and easy to apply self-contained kit that provides the solution to this new flammability requirement.

Product Components:

The AF 302-P is a self-contained kit comprised of the following components in each sealed bag:

AF 302-P Instruction Sheet	Reinforcement Scrim
Positioning Tape	Razor Blade
Two (2) Spreaders	Sand Paper
Pair of Vinyl Gloves	Cleaning Towel
Epoxy Kit	4" x 8" Patch
Tape for mounting Kit on Liner	

Product Use:

The AF 302-P is for repair of L shaped or U shaped tears up to 2" x 6" or slits up to 6" on all FAA approved liners of .01 thickness or greater. Multiple AF 302-P patches may be lapped together to repair more extensive damage.

FAA Approval:

The AF 302-P Patch Kit has been approved by the FAA for damage repair of baggage compartment liners that comply with those described under the section, Product Use. The AF 302-P complies with FAR 25.855 (a-1), Appendix F, Part III.
